| Input Voltage                         | 120 VAC 50 / 60 Hz                                                                   |                          |                                         |
| Power Consumption                     | 1050 W                                                                               |                          |                                         |
| Temperature Range                     | 150 °C - 380 °C (300 °F - 720 °F)                                                    |                          |                                         |
| MAIN UNIT                             | CONTROL UNIT                                                                         |                          |                                         |
| Power Consumption                     | 1000 W                                                                               | Power Consumption        | 50 W                                    |
| Dimension <sup>1</sup><br>(W x H x D) | When the height is set to the maximum:<br>350 × 210 × 480 mm (13.8 x 8.3 x 18.9 in.) | Dimension<br>(W x H x D) | 253 × 107 × 248 mm (10 × 4.2 × 9.8 in.) |
| Weight w/o Cords <sup>2</sup>         | 18 kg (39.7 lb)                                                                      | Weight w/o Cords         | 2.3 kg (5.1 lb)                         |
| Solder Pot Capacity <sup>3</sup>      | Approx. 10 kg (22 lb)                                                                |                          |                                         |

1 – Measured with adjustable feet fully extended. Minimum height is 190 mm (7.5 in)

2 – Weight does not include solder.

3 – Capacity is based on the weight of 63/37 solder.
